

A generative AI article writing platform with advanced SEO analysis!

Kafkai is equipped with an SEO analysis function and can generate highly accurate SEO-optimized articles. Unlike previous generations of AI, it is a new AI tool developed with a unique approach that does not require prompt engineering. Kafkai's unique technology is patented (patent application 2024-174460), so you can use it with confidence.

✓Easy to use!

Process-efficient interface with easy steps.

✓Advanced SEO analysis!

Run advanced SEO analysis on your domain and quickly generate important keywords.

✓Automatically generate SEO-friendly articles!

Analyze key keywords and use generative AI to create article content that improves search rankings.

What is Kafkai?

Kafkai is an AI-powered strategic content generation platform (AI content generator). It analyzes complex SEO data and uses AI to easily create articles, helping you improve the accuracy of your media and blogs and beat your competitors.

Kafkai doesn't just generate articles, it uses advanced SEO analysis to generate the best articles.

While most other AI content generators require you to enter the exact keywords you want to use when generating, Kafkai takes care of the most difficult SEO research part and provides content for your business with fewer resources.

Using Kafkai saves you time and money in the content (article) creation process and gives you a huge lead over your competitors.

Kafkai™

The screenshot displays the Kafkai web application interface. The top navigation bar includes the Kafkai logo, a breadcrumb trail (HOME > LALOKALABS.CO - JAPAN), and a language selector (EN). The left sidebar contains navigation links: Home, Laloklabs.co - JP, Choose A Strategy, My Articles, Ranking, and Performance. The main content area is divided into three sections: 'CHOOSE A STRATEGY' with buttons for 'Catch Up' (2082), 'Consolidate', 'Complete', 'Complement' (285), and 'Correlate'; 'PROJECT DETAILS' for 'laloklabs.co' with a URL and 'TESTPROJECT250115' and an 'Edit Project' button; and 'MY COMPETITORS' showing 'Japan chatgpt.com' with 2370 keywords, 7 articles, and 0 generating, alongside an 'Add Competitor' button. The bottom section, 'RECENT ARTICLES', features a table with columns for 'TITLE', 'STRATEGY', and 'DATE'. The first article is 'Unlocking the Power of ChatGPT: A Comprehensive Guide to Free AI Conversations' using the 'CATCH UP' strategy, dated 2025/03/11, with a word count of 3481 and a rating of 'No Rating Yet'.

TITLE	STRATEGY	DATE
Unlocking the Power of ChatGPT: A Comprehensive Guide to Free AI Conversations	CATCH UP	2025/03/11

How to use Kafkai

Kafkai makes it easy to generate articles in four easy steps.

Step 1

Create a project

Register domains (competing with yours) and prepare for analysis.

Step 3

Select Keywords

When you select one word from the analyzed and output keyword list, headline candidates and article structure are automatically generated.

Step 2

Choose a strategy

Choose one of the four strategies (four SEO analysis algorithms) offered.

Step 4

Article content generation

Check the proposed headline/structure, and if there are no problems, just click a button and the article will be generated.
You can also customize it to take your company's E-E-A-T into consideration.

Kafkai™

The image displays four sequential screenshots of the Kafkai web application interface, illustrating the four-step process for generating articles.

- Step 1: Create a project** - The first screenshot shows the 'HOME' page for 'laloklabs.co - JAPAN'. It features a 'CHOOSE A STRATEGY' section with four options: 'Catch Up' (2092), 'Consolidate' (1), 'Complete' (1), and 'Complement' (255). A 'PROJECT DETAILS' sidebar on the right shows the project name 'laloklabs.co' and a 'TESTPROJECT250115'.
- Step 2: Choose a strategy** - The second screenshot shows the 'STRATEGY - CATCH UP' page. It displays a search bar with 'Catch Up keywords are those that your competitors rank for, but you currently do not.' and a list of results for 'chat gpt free'.
- Step 3: Select Keywords** - The third screenshot shows the 'MY ARTICLES' page. It displays a list of generated articles, including 'chat gpt free' and 'chatgpt free', with details such as 'NOT RANKED FOR THIS KEYWORD' and 'KEYWORD METRICS'.
- Step 4: Article content generation** - The fourth screenshot shows the 'VIEW ARTICLE' page. It displays the generated article content, including the headline 'Unleashing the Power of ChatGPT: Revolutionizing Human-AI Interaction' and the introduction text.

Article creation screen image

Kafkai™

Kafkai generates professional articles in a fraction of the time.

The screenshot shows the 'GENERATE ARTICLE' page in the Kafkai interface. It features a sidebar with navigation options like Home, My Articles, and Ranking Performance. The main area displays 'chatgpt login' and 'gptchat' sections, each with a 'Generate Content with This Keyword' button. A blue box highlights the 'Output SEO keyword list' section, which shows a list of keywords and their metrics.

Output SEO keyword list

The screenshot shows the 'GENERATE ARTICLE' page in the Kafkai interface. It features a sidebar with navigation options like Home, My Articles, and Ranking Performance. The main area displays the 'Output Configuration Plan' section, which includes a list of outlines and a 'Customize Outlines' button. A blue box highlights the 'Output Configuration Plan' section, which shows a list of outlines and their metrics.

Output Configuration Plan

The screenshot shows the 'GENERATE ARTICLE' page in the Kafkai interface. It features a sidebar with navigation options like Home, My Articles, and Ranking Performance. The main area displays the 'Suggest output headings' section, which includes a list of suggestions and a 'Generate' button. A blue box highlights the 'Suggest output headings' section, which shows a list of suggestions and their metrics.

Suggest output headings

The screenshot shows the 'GENERATE ARTICLE' page in the Kafkai interface. It features a sidebar with navigation options like Home, My Articles, and Ranking Performance. The main area displays the 'Generate articles' section, which includes a list of articles and a 'Generate' button. A blue box highlights the 'Generate articles' section, which shows a list of articles and their metrics.

Generate articles

Main Feature ①

POINT 1 : Kafkai is easier to use than other generative AI

Kafkai analyzes and collects SEO data and generates articles based on that data.

Other AI content generation tools usually require you to prepare information such as content direction and your own business market data in advance, which can require rapid engineering techniques and be complicated to use.

On the other hand, Kafkai allows you to generate content relatively easily without worrying about preparation.

POINT 3 : Can be used without SEO knowledge

Kafkai is a service that proactively utilizes SEO data to create content that customers want. AI automatically analyzes your own site and competitors' sites, obtains the optimal keywords, and generates content.

Kafkai™

POINT 2 : Can be operated with fewer resource (4 Step)

Kafkai generates the best article content for you by simply inputting your domain and your competitors' domains and following four steps.

The screenshot displays the Kafkai web interface for a project named 'lalokalabs.co - JAPAN'. The interface is divided into several sections:

- Home:** Includes links to 'lalokalabs.co - JP', 'Choose A Strategy', 'My Articles' (with a notification badge), and 'Ranking Performance'.
- CHOOSE A STRATEGY:** A section titled 'Start generating now by choosing a strategy' with five buttons: 'Catch Up' (2082), 'Consolidate' (0), 'Compete' (0), 'Complement' (285), and 'Correlate'.
- PROJECT DETAILS:** Shows the project name 'lalokalabs.co', the URL 'https://lalokalabs.co/', and the project ID 'TESTPROJECT250115'. There is an 'Edit Project' button.
- MY COMPETITORS:** Lists 'Japan' and 'chatgpt.com' with '2370 keywords' and '7 articles'. It shows '0 generating' and an 'Add Competitor' button.
- RECENT ARTICLES:** A table with columns 'TITLE', 'STRATEGY', and 'DATE'. It lists an article titled 'Unlocking the Power of ChatGPT: A Comprehensive Guide to Free AI Conversations' with a strategy of 'CATCH UP' and a date of '2025/03/11'. Below the title, it says '3481 Words • No Rating Yet • chat gpt free'.
- ACCOUNT:** Shows the user 'demo1@lalokalabs.co', a 'Help' link, and a 'Logout' button.

Main Feature ② (Four Strategies)

Kafkai™

Kafkai offers four strategies for content generation: Catch Up, Enhance, Compete, and Complement. Each strategy uses SEO analysis algorithms to analyze and extract keywords that are suitable for your site's unique position, and generate optimal content that will help improve your search rankings.

Strategy 1 : Catch Up

Catch Up keywords are those that your competitors rank for, but you currently do not.

Strategy 2 : Consolidate

Consolidate keywords are those that your website ranks for, but your competitors do not.

Strategy 3 : Compete

Compete keywords are those that both your website and your competitor's website rank for.

Strategy 4 : Complement

Complement keywords are those neither your website nor your competitors rank .

Strategy 5 : Correlate

Identify and generate relevant, impactful keywords combined with actual competitor ranking data for your specified keywords.

A perfect plan for everyone
